### **Abstract of the Disclosure**

A high-pressure **fuel pump (10), in particular** a radial piston fuel pump, **is proposed** in which the intake valves ~~(35)~~ are embodied as ball valves, which has an advantageous effect on the efficiency of the high-pressure fuel pump **(10)**. Moreover, the production and  
5 assembly of the high-pressure fuel pump **(10)** of the invention are simplified by the use of ball valves.
